

Konstelec Engineers Completes ₹16.22 Cr IOCL Cryogenics Project, Reinforces Expertise in Industrial Electrical Infrastructure

Mumbai, June 9, 2026: Konstelec Engineers Limited (NSE SME: KONSTELEC) has successfully completed the Supply, Installation, Testing and Commissioning works for **Indian Oil Corporation Limited's (IOCL)** Cryogenics Business Group facility at Dindori, Nashik. The executed value of the completed project stood at approximately **₹16.22 crores** (including GST) against the original contract value of approximately ₹18.99 crores.

The scope of work included the installation and commissioning of transformers, **DG sets, HV & LV switchgears, cabling systems, lighting infrastructure, earthing systems, along with associated electrical and civil works.** The project involved the development of critical power distribution infrastructure to support IOCL's cryogenic operations facility.

The project was executed under a contract awarded by Indian Oil Corporation Limited and forms part of the Company's continued presence in the energy and industrial infrastructure sector. The successful completion demonstrates Konstelec's capabilities in delivering complex electrical and electromechanical projects for large public sector enterprises.

The completion of the project has been formally certified by Indian Oil Corporation Limited, with the Company receiving the completion confirmation on **June 08, 2026.**

Commenting on the order completion, Mr. Amish Shah, Managing Director at Konstelec Engineers Limited stated: *“The successful completion of this project for Indian Oil Corporation Limited reflects our strong execution capabilities in delivering critical electrical infrastructure projects for India's leading energy companies. Our team's commitment to quality, safety, and timely execution has enabled us to successfully deliver this important mandate. We remain focused on strengthening our presence in the oil & gas, energy, and industrial sectors while continuing to build long-term relationships with marquee clients.”*

About Konstelec Engineers Limited:

Konstelec Engineers Limited is an integrated EPC company specializing in Electrical, Instrumentation, and Automation systems. The company undertakes turnkey contracts encompassing installation, testing, commissioning, and maintenance of electrical and electromechanical systems across diverse sectors including oil & gas, refineries, petrochemicals, chemicals, cement, textiles, and space. KEPL offers end-to-end capabilities, including detailed engineering, procurement support, and comprehensive project management for complex electrical infrastructure projects.
